EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5 minute Digital Orthophoto Quarter Quadrangle (DOQQ), which covers one quarter the area of a USGS 15 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolutions for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Street-level data such as major interstates, US routes, state routes, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, streets in the orthophotography may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 USGS 7.5 minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter the area of a USGS 15 minute topographic quadrangle map.

BASE MAP DATA - All data is based on the 1:24,000 scale USGS topographic quadrangle maps and includes geographic names, places, roads and railroads, airports, and rivers. Some map data is neither current nor complete. Street data is based on Orthophoto Quadrangle data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
