This map displays 1990 black and white orthophotography based on the 1990 U.S.G.S. 7.5' Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter of the area of a U.S.G.S. 7.5' minute topographic quadrangle map. The photographs were taken in the spring of 1990 during leaf-off conditions and the general resolution for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match orthophotography shown in the photographs. stripe/roll data such as major waterbodies, US routes, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, streams in the orthophotography may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTOPHOTOGRAPHY - Orthophotography is provided by the U.S.G.S. and is based on 1990 U.S.G.S. 7.5' Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter of the area of a U.S.G.S. 7.5' minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic features, places and their symbols, towns boundaries, railroads, and airports. Some map data is neither current nor complete. Some data is based on outdated or expired data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
