This map displays 2004 black and white orthophotography for the State of Connecticut. The photographs were taken in last of fall and the ground resolution for the imagery is 0.3 feet per pixel. Unlike other statewide aerial surveys, the 2004 imagery is comprised mostly of 2004 photos, not photos taken during the spring of 2000 and 2001. A new introduced to improve image quality. This is due to the amount of time it took to produce the imagery. A new introduced to improve image quality. This is due to the amount of time it took to produce the imagery.

The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and clin collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry routes are displayed. Due to possible changes in street locations over time, locations of streets on the orthophotography may not match the locations of streets on the street layer. Also shown are airports, hospitals, educational facilities, parks, cemeteries, and key boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Imagery for the statewide orthophotography was provided by the State of Connecticut DCR, GIS, and DSI.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places, and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
