2004 Coastal Natural Color Orthophoto Madison, CT (South)

EXPLANATION

This map displays 2004 natural color orthophotography covering Long Island Sound coastal communities. The aerial flight spanned two days during September 2004 and the imagery was collected in panchromatic, Red, Green, Blue and Near Infrared which yielded both natural color and false color infrared versions of the completed digital orthophotography. The orthophotos are 0.5 meter (1.64 feet) in resolution. Additional GIS data such as major streams, U.S. routes, state routes, streets, railroads, and ferry crossings are displayed as well as airports, hospitals, educational facilities, train stations, and town boundaries.

DATA SOURCES

ORTHOPHOTOGRAPHY - This imagery was made possible by a grant from the NOAA Coastal Services Center in collaboration with the University of Connecticut, Wesleyan University and the Connecticut Department of Environmental Protection. Data collection and processing was performed by Earthstar Geographics.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their centers, town boundaries, airports, and railroads. Basic map data is subject to errors or omissions. Basic data sources are the Connecticut Department of Transportation, U.S. Geological Survey, U.S. Census Bureau, and aerial photography.

MAP AND DRAINAGE DATA - This 2004 map was created by a variety of sources and is not intended to replace official maps. This map is for general reference only.
