This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.39 feet (1 meter) spatial accuracy. The location and shape of features in other aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, U.S. routes, state routes, streets, railroads, and utility crossings are displayed yet may not match the location of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and campus boundaries. Important geographic locations and waterbodies are labeled.
