This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, or false color combined with orthophotography. The orthophotography is not color balanced; individual ortho images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other EIS layers will not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, 15 route, state route, arterials, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and ocean boundaries. Important geographic locations and water bodies are labeled.

**DATA SOURCES**

**ORTHOPHOTOGRAPHY** - Image provided by the National Agricultural Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

**BASE MAP DATA** - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is not current nor complete.

**SHORELINE DATA** - Based on 2006 Coastal Orthophotography data.

**MAPS AND DIGITAL DATA** - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
