This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural-color, true color, 1:3,799 foot (1 meter) aerial survey taken on July 16th and 17th and August 5th, 15th, 14th, or 16th, depending on the area. The orthophoto mosaic is not color balanced as color variations between individual aerial image is not controlled. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other EIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection data. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophoto. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and wetlands are depicted.

DATA SOURCES

ORTHOGRAPHY: Ecosystem Services to the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic features, classes and their symbology, town boundaries, railroads, and airports. Base map data is not current and not complete. Street data based on Esri’s aerial photography data.

MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DCR website to download the base map digital spatial data shown on this map.
