This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, true color 1:7,920 scale aerial survey taken on July 16th and 17th and August 5th, 2006. This map was created from orthophotography in Lambert Conformal Conic Projection with North American Datum of 1983. This data is not color balanced as small differences between individual image may not contrast. When viewing color differences, please refer to the orthophotography in the Orthophotographs section of the 2006 Ortho Image Imagery product. The location and slope of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and ferry boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic features, places and their symbols, trees boundaries, railroads, and airports. Some map data is rather current and complete. Other data is based on 1998 National Hydrography data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT EDF website to download the base map digital spatial data shown on this map.
