This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, or 3.79 feet (1 meter) aerial survey taken on July 10th and 15th and August 5th, 15th, 24th, or 26th, depending on the area. The materials means is not color balanced so color differences between individual input image is not controlled. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other ESI layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streams, railroads, and ferry crossings are displayed yet may not match the location of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and some boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Provided by the National Agricultural Imagery Program, (NAIP) a part of the USDA Farm Service Agency through the Aerial Photography Field Office at South Hadley, MA.
BASE DEP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. Street data is based on Esri databases orthophotographic data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
