EXPLANATION

This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 0.37 foot (1 meter) aerial survey taken on July 15th, 15th, and August 15th, 15th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced so visual comparisons between individual aerial images is not consistent. This will create differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other EIS images will not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, U.S. routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the location of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their boundaries, town boundaries, railroads, and airports. Some map data is neither current nor complete. These data are based on Federal and state Orthophotographs.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
