This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 1.79 feet (1 meter) aerial survey taken on July 16th and 17th and August 5th, 2006 Orthophotography

The location and slope of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US route, state route, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are delineated.

2006 Orthophotography
Haddam, CT
(East)

DATA SOURCES

2006 Orthophotography - Imagery provided via the National Agricultural Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in South Boston, MA.

BASE DEP DATA - All data is based on 1:24000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. These data are neither current nor complete. These data are based on 2006 orthophotography data.

Map prepared by CT DEP, December 2016. Map is not colorfast.
