This map displays 2006 National Agricultural Imagery Program (NAP) orthophotography for the State of Connecticut. It is a natural color, land on, 3.39 feet (1 meter) aerial survey taken on July 10th and 15th and August 16th, 15th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced so subtle differences between individual aerial images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other ESI layers will not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major maintained, US routes, state routes,arteries, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and some boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City, UT.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. Some map data is neither current nor complete. Some data is based on 1:24,000-scale orthogonal data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.

EXPLANATION

2006 Orthophotography
Montville, CT (East)
