EXPLANATION

This map displays 2006 National Agriculture Imagery Programs (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 1:399 feet (1 meter) spatial resolution taken on July 13th and 17th and August 2nd, 15th, 19th, and 23rd, depending on the area. The statewide mosaic is not color balanced so tonal imbalances between images are not consistent. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other landcover layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, airports, railroads, and ferry crossings are displayed but may not match the location of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and some boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Mosaic provided by the National Agriculture Imagery Program (NAIP), a part of the USDA Farm Service Agency through the Aerial Photography Field Office in St. Louis City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is raster content not complete.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
