This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on, 3.39 feet (1 meter) spatial survey taken on July 10th and 13th and August 5th, 15th, 14th, or 16th, depending on the area. The statewide mean is not color balanced as color variations between individual map images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and slope of barriers in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection data. Street-level data such as minor intersections, utility routes, private driveways, and utility crossings are displayed but may not match the locations of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and some business. Important geographic locations and town boundaries are included.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program, (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Northfield, IL.
BASE DEP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. These data is based on 1:24,000 orthogonal data.
MAPSANDDIGITALDATA - Visit the CT DCF website for this map and a variety of others in PDF format. Visit the CT DCF website to download the base map digital spatial data shown on this map.
