This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 1.79 feet (5 meters) aerial survey taken on July 19th and 23rd and August 5th, 15th, 14th, or 16th, depending on the area. The statewide mean is not color balanced as small variations between individual square mile is not controlled. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streets, railroads, and utility crossings are displayed yet may not match the locations of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and towns are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Provided by the National Agriculture Imagery Program (NAIP), a part of the USDA'S Farm Service Agency through the Aerial Photography Field Office in Beloit, Wisconsin.

BASE DEP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. Most data is based on 1992/93 orthophotographic data.

MAPS AND DIGITAL DATA - Visit the CT DSG website for this map and a variety of others in PDF format. Visit the CT DSG website to download the base map digital spatial data shown on this map.
