This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 1.39 feet (1 meter) aerial photography taken on July 16th and 17th and August 14th, 15th, 16th or 17th depending on the area. The materials and means are not color balanced so visual differences between individual aerial images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other EIS studies will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection data. Street-level data such as major interstates, US routes, state routes, airports, railroads, and ferry crossings are displayed yet not match the location of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Provided by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. These data is based on U.S. Geological Survey data.

MAPS AND DIGITAL DATA - Visit the CT DEC website for this map and a variety of others in PDF format. Visit the CT DEC website to download the base map digital spatial data shown on this map.
