This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, true color, or 1:3,790 ft (1 meter) aerial survey taken on July 19th and 20th and August 5th, 15th, 14th, or 16th, depending on the area. The statewide seam is not color balanced so visual differences between individual input images is not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other EIS imagery will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major transects, US routes, state routes, arteries, railroads, and ferry crossings are displayed but may not match the location of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and census boundaries. Important geographic locations and waterbodies are added.

DATA SOURCES
ORTHOPHOTOGRAPHY - Data provided to the State of Connecticut by the National Agricultural Imagery Project (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, planimetric and thematic symbology, town boundaries, railroads, and airports. Some map data is neither current nor complete. Basemap data sourced from Connecticut Geographic data.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT ECO website to download the base map digital spatial data shown on this map.

EXPLANATION
Protect from light and moisture.

2006 Orthophotography
Naugatuck, CT
