EXPLANATION

This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a true color, last on 3,795 feet (1 meter) aerial survey taken on July 10th and 11th and August 1st, 13th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced so tonal imbalances between individual input images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, avenues, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled. Visit the CT ECO website for this map and a variety of others in PDF format. Map prepared by CT DEP December 2018. Map is not colored. Protect from light and moisture.

DATA SOURCES

ORTHOPHOTOGRAPHY - Promptly provided for the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete.

MAP AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
