This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false on 1:24,000 scale and displays geographic names, places and waterbodies are labeled. The location and slope of features in other EIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, private, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and sewer boundaries. Important geographic locations and waterbodies are shaded.

DATA SOURCES
ORTHOPHOTOGRAPHY: imagery provided by the National Agricultural Imagery Program (NAIP), a part of the USGS Farm Service Agency through the Aerial Photography Field Office in South Pittsburg, TN.
BASE DEP DATA: All data is based on 1:24,000 scale and displays geographic names, places and their symbols, river boundaries, railroads, and airports. Some map data is rather current not completed. These data is based on Federal geographic data.
MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
