This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, based on 3.79 feet (1 meter) aerial survey taken on July 18th and 19th and August 5th, 15th, 16th, or 17th, depending on the area. The statewide coverage is not color balanced so visual differences between individual map images may be noted. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other EIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Three-level data such as major waterbodies, US routes, state routes, airports, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Radiant Imaging, Inc. for the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in each State (City)
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. These data is owned by the University of Connecticut Data Sources (City)
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
