EXPLANATION

This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color image, but it has not been color balanced so tonal imbalances between individual images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other EIS layers will not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Frankly provided by the National Agricultural Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in St. Louis, MO.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their spatial, town boundaries, railroads, and airports. Base map data is neither current nor complete. Street names based on 1:24,000 orthophotographic data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
