This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on, 1.39 feet (5 meter) aerial survey taken on July 16th and 17th and August 5th, 15th, 16th, or 16th, depending on the area. The statewide mosaic is not color balanced so tonal imbalances between individual aerial image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophoto. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agricultural Imagery Program (NAIP), a part of the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE DEP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, roads, and airports. Some map data is rather current yet incomplete. Street data based on TeleAtlas copyrighted data.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
