This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 3,799 feet (1 meter) aerial surveys taken on July 16th and 17th and August 5th, 17th, 19th, and August 26th, 2006. The orthophotography data are based on aerial images. The resolution of the aerial images used to generate the orthophotography is 1 foot (0.3 meters). This may vary slightly depending on the area viewed. The location and shape of features in other layers may not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed. However, the locations of such features in the orthophotography are not shown. Also shown are airports, hospitals, educational facilities, train stations, and tennis boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in St. Louis, Mo.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, stream boundaries, railroads, and airports. Some map data is neither current nor complete. These data is based on U.S. Government orthophotographic data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
