This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, fast on 0.799 feet (1 meter) aerial survey taken on July 16th and 17th and August 5th, 2006. Depending on the area, the best color balance and overall orthophotography between individual image images is not consistent. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and other crossings are displayed yet may not match the location of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and parks areas. Important geographic locations and watershed boundaries are shown.

DATA SOURCES

ORTHOPHOTOGRAPHY: Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Hartford, CT.

BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, place and land symbols, town boundaries, railroads, and airports. These map data is neither current nor complete. These data is based on USGIS orthophotographic data.

MAPS AND DIGITAL DATA: Visit the CT DEEP website for more information and a variety of other topics. Visit the CTDEP website to download the base map digital spatial data shown on this map.
