2006 Orthophotography
Lebanon, CT
(Northeast)

This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, best on 2.39 feet (0.8 meter) aerial survey taken on July 18th and 19th and August 2nd, 15th, 19th, or 20th, depending on the area. The statewide mosaic is not color balanced so visual differences between individual exposures is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS systems will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection data. Street-level data such as major interstates, US route, state route, streets, railroads, and utility crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, airports, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USGS Farm Service Agency through the Aerial Photography Field Office in North Easton, MA.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic entities, phases and features, town boundaries, railroads, and airports. Some map data is not current or complete. This data is based on EsriBaseMap or other copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT ECW (http://ct.ecw.state.ct.us) website for this map and a variety of others in PDF format. Visit the CT eGrid website to download the base map digital spatial data shown on this map.

Disclaimer: This map is not to scale. Projections from UTM and equal area.
