This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, true on 1.39 feet (1 meter) vertical accuracy, and displays geographic names, places and town boundaries. Important geographic locations and their symbols, town boundaries, railroads, and airports are displayed yet may not match the accuracy and data collection dates. The statewide aerial survey taken on July 16th and 17th and August 5th, 13th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced so tonal imbalances between individual input image is not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as minor streets, US routes, state routes, airports, railroads, and ferry crossings are displayed yet may not match the location of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP) a part of the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and town boundaries, railroads, and airports. BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and town boundaries, railroads, and airports. BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and town boundaries, railroads, and airports.
