2006 Orthophotography
Lebanon, CT
(Northwest)

EXPLANATION
This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, fast on 3.79 feet (1 meter) scale, and survey taken on July 28th and 17th and August 15th, 15th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced, so visual differences between individual aerial images is not considered. This will create differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Minor-level data such as minor streams, US routes, state routes, streets, railroad crossings are displayed yet may not match the location of such features in the orthophoto. Also shown are airports, hospitals, educational facilities, train stations, and some boundaries. Important geographic locations and supplement data are added.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in plantsville, CT.
BASE DEP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, streets, boundaries, railroads, and airports. Base map data is neither current nor complete. Street names are not used for high-speed aerial photography data.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT ECO website to download the base map digital spatial data shown on this map.

Map prepared by CT DEP December 2018
Maps are not colorfast.
