This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on July 18th and 19th and August 5th, 15th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced so slight variations between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other EIS insets will not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Minor-level data such as major reservoirs, US routes, state routes, airports, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and sewer boundaries. Important geographic locations and waterbodies are delineated.

DATA SOURCES
ORTHOPHOTOGRAPHY - Provided by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Oak Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. Street data is based on 1:12,000 scale orthophotographic data.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT ECO website to download the base map digital spatial data shown on this map.
