2006 Orthophotography
Rocky Hill, CT

EXPLANATION
This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 1.79 feet (0.3 meter) aerial photography taken on July 15th and 17th and August 3rd, 5th, 15th, 19th, or 26th, depending on the area. The statewide mosaic is not color balanced so small differences in individual image mosaics are not controlled. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other ERS images will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection data. Street-level data such as major interstates, U.S. routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the location of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Originally furnished by the National Agriculture Imagery Program (NAIP), a part of the USDA's Farm Service Agency through the Aerial Photography Field Office in Stillwater, MN.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is outdated and not complete. This data is based on tiles from DigitalGlobe orthophotos.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT ECO website to download the base map digital spatial data shown on this map.
