This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 3.79 feet (1 meter) aerial survey taken on July 16th and 17th and August 3rd, 15th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced so visual discontinuities between individual input images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other EIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. 30-foot level data such as major features, US routes, state routes, and railroads and 30-foot level data will not match the locations of such features in the orthophotograph. Some areas are airports, hospitals, educational facilities, train stations, and steam boundaries. Important geographic locations and riverbeds are deleted.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. Street data is based on various orthophotographic data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
