This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, fast-on, 7.79 feet (1 meter) aerial survey taken on July 16th and 17th and August 5th, 15th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced so visual variations between images may be not equal. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match shown in the orthophotos primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the location of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program, (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASEemap DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. Base map data is neither current nor complete. Street data based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for a variety of other maps.
