This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 1, 3, 7, 9, and 15 ft (3 meter) aerial survey taken on July 15th and 17th and August 5th, 15th, 19th, or 16th, depending on the area. The statewide mosaic is not color balanced as small differences between individual mosaic images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not always match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, U.S. routes, state routes, avenues, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophoto. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Originally provided by the National Agricultural Imagery Program, (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. Base data is based on tiles in copyrighted orthophotographic data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website for declassified the base map digital spatial data shown on this map.
