This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a base color, leaf on, 3.39 feet (1 meter) aerial survey taken on July 16th and 17th and August 11th, 15th, 14th, or 16th, depending on the area. The statewide mean is not color balanced so visual differences between individual map images may be noticeable. This will create visual effects in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Survey-level data such as major waterbodies, US routes, state routes, airports, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are displayed.

DATA SOURCES
ORTHOPHOTOGRAPHY — Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USGS Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA — All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is rather current but incomplete. Shaded data is based on 1:40,000 orthophotographic data.

MAPS AND DIGITAL DATA — Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
