This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, true color, 3.79 foot (1 meter) aerial surveys taken on July 3rd and 17th and August 5th, 15th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced so tonal imbalances between individual image mosaic is not contoured. This will cause variations in the range and intensity of colors depending on the area viewed. The location and shape of features in other EIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, arterials, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and river boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agricultural Imagery Program (NAIP) through the USDA’s Farm Service Agency as part of the USDA’s Farm Service Agency through NAIP; a part of the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on a 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. Street data is not shown on this base map digital spatial data shown on this map.
MAPS AND DIGITAL DATA - For more information on the base map digital spatial data shown on this map. Visit the CT DEP website to download the base map digital spatial data shown on this map.
