This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, taken on July 14th and 17th and August 5th, 15th, 18th, or 16th, depending on the area. The statewide mosaic is not color balanced so visual differences between individual aerial images may be present. This can cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other ESRI layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, U.S. routes, state routes, arteries, railroads, and ferry crossings are displayed yet may not match the location of such features in the orthophotos. Also shown in orthophotography are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program, NAIP, a part of the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and town boundaries. Important geographic locations and waterbodies are included.

EXPLANATION
Map is not color balanced. Important geographic locations and waterbodies are labeled. Visit the CT DEP website to download the base map digital spatial data shown on this map.
