This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. If a natural-color, last on 1.39 feet (1 meter) aerial survey taken on July 10th and 11th and August 5th, 15th, 16th, or 17th, depending on the area. The statewide coverage is not color balanced, so color variations between individual aerial images are not controlled. This will create differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and other boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: Digitally processed by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in West Hartford, CT.
BASE DEP DATA: All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. Base map data is either current or completed. Street data is based on the Esri Digital Topographic data.
MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.

EXPLANATION

2006 Orthophotography
Killingly, CT
(South)
