2006 Orthophotography
Madison, CT
(South)

EXPLANATION
This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 1:2,794 scale (1 inch = 100 feet) aerial survey taken on July 14th and 15th and August 3rd, 15th, 14th, or 16th, depending on the area. The statewide mosaic is not color balanced so visual differences between individual aerial images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US route, state routes, airports, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotograph. Also shown are airports, hospitals, educational facilities, train stations, and stream boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA's Farm Service Agency through the Aerial Photography Field Office in each state.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, stream boundaries, railroads, and airports. Some map data is not current or not complete. Street names and other labels are incorrect.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
