EXPLANATION

This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, based on 1.79 feet (0.55 meter) aerial survey taken on July 9th and 22nd, August 3rd, 15th, 19th, 20th, 21st, and 22nd, depending on the area. The statewide mosaic is not color balanced so tonal imbalances between individual image mosaics are not consistent. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other EROS images will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, arteries, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA Farm Service Agency through the Aerial Photography Field Office in South Boston.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. Base map data is neither current nor complete. Street data is based on Telvent orthophotographic data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
