This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 3.79 feet (1 meter) aerial survey taken on July 16th and 17th and August 5th, 15th, 14th, or 16th, depending on the area. The statewide mosaics are not color balanced so tonal imbalances between individual aerial images are not combined. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features (in other ELS layers) will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophoto. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are identified.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in North Carolina.
BASE DEP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. This data is based on 1990s cooperative aerial photography
MAPS AND DIGITAL DATA - Visit the CT GIS website for this map and a variety of others in PDF format. Visit the CT EPS website to download the base map digital spatial data shown on this map.
