2006 Orthophotography
Waterford, CT
(South)

EXPLANATION
This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, true color, 3.39 feet (1 meter) aerial survey taken on July 10th and 11th and August 11th, 15th, 18th, or 19th, depending on the area. The sheetwise mosaic is not color balanced so tonal variations between individual sheets may be not consistent. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other EROS images will not exactly match information shown in the orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, airports, railroads, and ferry crossings are displayed but may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: Imagery provided by the National Agricultural Imagery Program (NAIP), a part of the USDA Farm Service Agency through the Aerial Photography Field Office in West East City.
BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is entirely current and complete. Street data is based on Esri base geographical data.
MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
