EXPLANATION

This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, 1:3,790 scale (1 inch = 396 feet) aerial photograph taken on July 15th and 17th and August 9th, 15th, 14th, or 16th, depending on the area. The statewide coverage is not color balanced so visual differences between individual aerial images is not controlled. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection data. Street-level data such as major interstates, US routes, state routes, airports, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophoto. Also shown are airports, hospitals, educational facilities, train stations, and river boundaries. Important geographic locations and town boundaries. Important geographic locations and town boundaries are displayed.

DATA SOURCES

ORTHOPHOTOGRAPHY - Imagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in St. Paul, MN.

BASE D&B DATA - All data is based on 1:24,000 scale and displays geographic features, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. Base data is based on U.S. Geological Survey topographic data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT ECO website to download the base map digital spatial data shown on this map.
