This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, full on, 1:39 feet (1 meter) scale aerial survey taken on July 16th and 17th and August 5th, 2006, using 15B, 14B, and 16A, depending on the area. The statewide mosaic is not color balanced so tonal imbalances between individual input images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other EIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, airports, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Funded and provided by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. Some map data is rather current yet incomplete. Most data is based on USGS topographic data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others is PDF format. Visit the CTDEP website to download the base map digital spatial data shown on this map.
