This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is not color balanced as tonal imbalances between individual input images are not controlled. This will create differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other ESS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, arterial, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Orthoimagery provided by the National Agriculture Imagery Program (NAIP), a part of the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE DEP DATA - All data is based on 1:24,000 scale and displays geographic names, pluses and plus symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. Basemaps based on USGS 1:100,000 digital base data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
