This map displays 2006 National Agriculture Imagery Program (NAIP) orthophotography for the town of Lyme, Connecticut. It is a natural-color, false-color 3.79-foot (1 meter) aerial survey taken on July 10th and 15th and August 15th, 15th, 18th, or 16th, depending on the area. The information content is not color balanced and color differences between individual areas may not match. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other GIS layers will not exactly match the information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major streets, US routes, state routes, airports, railroad and ferry crossings are displayed yet may not match the locations of such features in the orthophotos. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Funded by USDA National Agriculture Imagery Program (NAIP) as a part of the USDA Farm Service Agency through the Aerial Photography Field Office in South Easton, CT
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, roads, and airports. Some map data is older/incorrect not complete. Other data is based on 1:24,000 scale data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
