This map displays 2006 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, last on 3.79 feet (1 meter) aerial survey taken on July 16th and 17th and August 5th, 1996, 1997, 1998, or 1999, depending on the area. The scalewise means is not color balanced as small variations between individual area images may notbe constant. This will cause differences in the range and intensity of colors depending on the area viewed. The location and slope of features in other ERS images will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, airports, railroads, and ferry crossings are displayed yet may not match the locations of such features in the orthophotographs. Also shown are airports, hospitals, educational facilities, train stations, and sewer boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Digitally provided by the Natural Resources Imagery Program, (NAIP), a part of the USDA's Farm Service Agency through the Aerial Photography Field Office in Stillwater, MN.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic features, places and their symbols, town boundaries, railroads, and airports. Some map data is rather current not complete. Most data is based on 1990s copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DOT website for this map and a variety of others in PDF format. Visit the CT DOT website to download the base map digital spatial data shown on this map.
