This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotochromy for the State of Connecticut. It is a natural color, low-contrast 1:3,954 scale aerial survey taken on July 3rd, 9th, 16th, 20th, and 26th. The different shades are not color balanced; natural imbalances between individual input images are not corrected. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and manuscript are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USGS (US Department of Interior) through the National Agriculture Imagery Program (NAIP) Office at South Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and depicts geographic names, places and their symbols, town boundaries, school districts, roads, and highways. This map data is neither current nor complete. Street data is based on multiple digitized data sources.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in this series. This CT ECO address is included in the base data digital spatial data layers on this map.
