This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, 3.79 feet (1.1 meter) aerial survey taken on July 3rd, 10th, 15th, 16th, and 19th. The statewide resolution is not color balanced so small imbalances between individual input images are not纠正. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography precisely due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, county routes, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographical locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on USGS 1:24,000 scale and displays geographic names, places and their boundaries, major topography, symbols, and waterbodies. This map data is neither current nor complete. Street data is based on Teloc/pixi orthophotographic data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital orthophoto data shown on this map.
