This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf-on, 1.39 foot (1 meter) aerial survey taken on July 3rd, 199, 13th, 198, and 198. The statewide mosaic is not color balanced so visual imbalances between individual input images are not removed. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and river boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Fort Belvoir, VA.

BASE MAP DATA - All data is based on USGS data and displays geographic names, places and their symbols, base boundaries, topography, and waterbodies. Shape data is neither current nor complete. Street data is based on SEDT/USGS orthophotography data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other map resources. Visit the CT DEP website to download the base map digital pixel data derived on this map.
