2008 Color Orthophoto
Brookfield, CT

EXPLANATION
This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, true-color 3.39 inch (1 meter) aerial survey taken on July 7th, 10th, 14th, 18th, and 22nd. The orthophoto process is not color balanced so small imbalances between individual input images are not removed. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features is either US layer will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA, Farm Service Agency through the NAIP Photographic Field Office in Salt Lake City, UT.
BASE MAP DATA - All data is based on 1970 USGS data and displays geographic names, places and their symbols, town boundaries, edges, and waterbodies. Some map data is neither current nor complete. Street data is based on 1988/1993 aerial photography data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of others in digital format. Visit the CT DEP website to download the base map digital aerial data shown on this map.
