This map displays 2008 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color 3.39 feet (1 meter) aerial survey taken on July 3rd, 10th, 11th, and 18th. The statewide mosaic is not color balanced so visual similarities between individual input images are not assured. This will create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP). Provided by the USGS Farm Service Agency through the Agricultural Imagery Program Office in Fort Belvoir, VA.
BASE MAP DATA - All data is based on USGS scale and displays geographic names, places and their descriptors, town boundaries, highways, and railroads. Data map data is neither current nor complete. Street data is based on Microsoft's copyrighted data.
MAPS AND DIGITAL DATA - Visit the CT DEC website for this map and a variety of other online GIS services. Visit the CT DEC website to download the base map digital data layer shown on this map.
